Additional Resources:

- Visit www.mfgday.com and learn about manufacturing events and plant tours in your state.
- Speak to your guidance counselor and ask to learn more about manufacturing or connect them with your local Dream It. Do It.
- Enroll in a local SkillsUSA or First Robotics Competition.
- Check out the Manufacturing Institute's M-List to find a school where you can obtain manufacturing certifications.

FIGURING OUT WHAT YOU WANT TO DO WITH YOUR LIFE AFTER HIGH SCHOOL IS OVERWHELMING.

We know because we've been in your shoes. You constantly hear these questions thrown at you: What are your plans after high school? What are you interested in? What do you want to do? They come from your family, your teachers, or your guidance counselor. But in the end, it comes down to you. Your goals, your education, and your career is about what you're passionate about. To make that decision, you need to know about careers that work with advanced technology, provide competitive salaries, and don't require a mountain of student debt

Would that type of career interest you? Keep reading.

THE IMPACT OF MANUFACTURING IS BIGGER THAN YOU THINK

In manufacturing, you can develop medicine that saves someone's life or even create instruments played by some of the world's greatest artists. Not many people can say that of their job. To obtain a job in manufacturing, all you need is some technical skills. It doesn't require years of schooling and high level degrees, but simply a good work ethic and industry certifications. These certifications allow employers to understand your skills and hire you into the right job. Earning certifications will increase your chances of obtaining a well-paid, respected job.

THIS ISN'T **GRANDPA'S** MANUFACTURING.

In 2012, the average

manufacturing worker in

the United States earned

\$77,505 annually, including

pay and benefits. The

average worker

earned

in all industries

\$62,063.

Today's manufacturing industry is completely different from what it used to be. It is no longer repetitive, lowskilled work. Trust us, your grandparents, and maybe even your parents, would not recognize today's manufacturing. The industry today is about advanced technologies, state of the art facilities, and fast paced work environments. Most importantly, manufacturing is about creating products that affect everyone's daily lives and even change the world.

Want to see it for yourself? Take a tour through a local manufacturing facility on Manufacturing Day or online at www.manufacturevourfuture.com/.

HIGHER PAY, BETTER BENEFITS, GROWTH OPPORTUNITIES.

available through many employers.

MANUFACTURERS NEED

YOUNG TALENT The manufacturing industry is experiencing a

lack of skilled workers and it is up to nextgeneration leaders, like you, to step up to the plate. Manufacturing needs the educated and skilled talent that comes from the younger generations. By starting at a young

Millwright

age in this industry, the possibilities are limitless with a career in manufacturing. Manufacturing holds a place for all types of workers, whether you like to work with your hands or on the computer. And once you get started, the growth opportunities are endless. One day, you could be running a manufacturing company yourself.

THAT'S MANUFACTURING.
